

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A synergistic herbicidal mixture comprising
  - A) Imazamox, including its respective isomers as well as its respective environmentally compatible salts or esters or amides or other derivatives; and
  - B) at least one herbicidal compound selected from of the group consisting of chloro acetamides, oxyacetamides and tetrazolinones as well as quinmerac, including their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives and, if desired,
  - C) at least one herbicidal compound selected from the group consisting of clomazone, atrazin, dichlormid, benoxacor, LAB-145138, MG-191, MON-13900, cyometrinil, oxabetrinil, fluxofenim, flurazole, naphtalicacidanhydride, fenchlorim, fenchlorazol, mefenpyr, cloquintocet (including its hydrate(s)), 1-ethyl-4-hydroxy-3-(1*H*-tetrazol-5-yl)-1*H*-quinolin-2-one, 4-carboxymethyl-chroman-4-carboxylic acid, *N*-(2-methoxy-benzoyl)-4-(3-methyl-ureido)-benzenesulfonamide, (3-oxo-isothiochroman-4-ylidenemethoxy)-acetic acid methyl ester, including

their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives.

2. (Currently Amended) A synergistic herbicidal mixture as claimed in claim 1 in which component B) are is a chloro acetamides, including their its respective isomers as well as their its respective environmentally compatible salts or esters or amides or other derivatives.
3. (Currently Amended) A synergistic herbicidal mixture as claimed in claims 1 to 2 claim 2 in which the chloro acetamides, including their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives are is selected from the group consisting of metazachlor, metolachlor and dimethenamid-, including their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives.
4. (Currently Amended) A synergistic herbicidal mixture as claimed in claims 1 to 3 claim 3 in which the chloro acetamide is metazachlor, including its respective isomers as well as its respective environmentally compatible salts or esters or amides or other derivatives.

5. (Currently Amended) A herbicidal composition comprising a herbicidally active amount of a synergistic herbicidal mixture as claimed in ~~any of claims 1 to 4~~ claim 1, at least one inert liquid and/or solid carrier and, if desired, at least one further additive.
6. (Currently Amended) A method of controlling undesired vegetation, which comprises applying a synergistic herbicidal mixture as claimed in ~~any of claims 1 to 4~~ claim 1 before, during and/or after the emergence of undesired plants simultaneously or in succession.
7. (Currently Amended) A method as claimed in claim 6, ~~used in~~ wherein the undesired vegetation is proximate crops.
8. (Previously Presented) A method as claimed in claim 7, wherein the crops are tolerant or resistant against the synergistic herbicidal mixture.
9. (Currently Amended) A method as claimed in ~~claims 7 to 8~~ claim 7, wherein the crop is brassica napus.
10. (Currently Amended) A method of controlling undesired vegetation in ALS-herbicide resistant or tolerant brassica napus, which comprises applying simultaneously or in succession, at least proximate the brassica napus a synergistic herbicidal ~~mixture comprising~~ effective amount of

A) a compound selected from the group consisting of an imidazolinones, including their respective isomers thereof as well as their respective environmentally compatible salts or esters or amides or other derivatives thereof and B) at least one herbicidal compound of selected from the group consisting of chloro acetamides, oxyacetamides and tetrazolinones as well as quinmerac including their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives and, if desired C) at least one herbicidal compound selected from the group consisting of clomazone, atrazin, dichlormid, benoxacor, LAB-145138, MG-191, MON-13900, cyometrinil, oxabetrinil, fluxofenim, flurazole, naphtalicacidanhydride, fenchlorim, fenchlorazol, mefenpyr, cloquintocet (including its hydrate(s)), 1-ethyl-4-hydroxy-3-(1*H*-tetrazol-5-yl)-1*H*-quinolin-2-one, 4-carboxymethyl-chroman-4-carboxylic acid, *N*-(2-methoxy-benzoyl)-4-(3-methyl-ureido)-benzenesulfonamide, (3-oxo-isothiochroman-4-ylidenemethoxy)-acetic acid methyl ester, including their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives before, during and/or after the emergence of undesired plants simultaneously or in succession.

11. (New) The method of claim 10, wherein component B) is a chloro acetamide selected from the groups consisting of metazachlor, metolachlor and dimethenamid.

12. (New) The method of claim 11, wherein the chloro acetamide is metazachlor.

13. (New) The method of claim 10, wherein the component C) is selected from the group consisting of clomazone, atrazin and the safener cloquintocet, including esters and hydrates thereof.

14. (New) The method of claim 10, wherein the application rate of the active ingredients is 5 to 2500 g/ha.

15. (New) The method of claim 10, wherein the compounds which are applied are Imazamox together with at least one further compound selected from the group consisting of

- a) Metazachlor
- b) Metolachlor
- c) Dimethenamid
- d) Metazachlor and clomazone
- e) Metazachlor and quinmerac
- f) Metolachlor and atrazin
- g) Flufenaet
- h) Fentrazamid.
